

P3. Write a program ask a user: 'What do you like most at school? ' and reflect it back.

Example:

```
=====
What do you like most at school? Computer
Programming
I am glad you like Computer Programming
=====
```

A **bold** font indicates what a user might type in. An *italic* is what the program reflects from what a user typed in.

Note! You'll get partial credit if you do hard code! There are more test cases than the example here.
