

P10. Write a program to get two numbers from a user and divide the first one by the second one, and print out its quotient and remainder:

Example:

=====

a: **18**

b: **16**

a/b gives a quotient of *1* and a remainder of *2*

=====

A **bold** font indicates what a user might type in. An *italic* is what the program reflects from what a user typed in.

*Hint: try // and %.*
