PS. Grading program

Write a program to take a score from a user and then report the grade as follows.

When score < 40, grade is 'F'.

When score is in [40, 50), grade is 'D'.

When score is in [50, 60), grade is 'C'.

When score is in [60, 70), grade is 'C+'.

When score is in [70, 80), grade is 'B'.

When score is in [80, 90), grade is 'B+'.

When score ≥ 90, grade is 'A'.

Examples (multiple runs)

```
===========================================================
Enter your score:28                 Enter your score:88

F                                   B+

========================            ========================
Enter your score:42                 Enter your score:93

D                                   A

========================            ========================
Enter your score:54

C

========================
Enter your score:68

C+

========================
Enter your score:75

B
```
