

P3. Write a function named `grow_list` taking 2 arguments a starting list and a new item to add, adding the item to the list, and returning the list with the added item.

Example

When invoke by

```
res = grow_list([2, 4, 8, 16], 32)
print(res)
```

it results

```
=====
[2, 4, 8, 16, 32]
=====
```
