

T1P13 – Decimal and Fraction

Write a program to display the fraction of input floating number.

Testcases

Input will be in the format of Number, decimal, and non-terminating decimal respectively, separated by comma.

e.g. 0,,0 mean 0

1,2,0 mean 1.2

11,3,2002 mean 11.3200220022002...

7,,9 mean 7.099999999...

Hint math.gcd(a,b) is the function to find the greatest common divisor (ท.ร.น.)

Sample Testcase

Input	Actual Number	Output
7,,0	7.0	7 / 1
0,5,0	0.5	0 / 1
123,456,789	123.456789789789...	41111111 / 333000
